

# Optimum care for your plant technology

The leading service provider for building services in Germany.

For many years we have been the first port of call in Germany for problems and solutions involving building equipment with a focus on heating.

We are Germany's leading national service provider for building services installations. Whether you wish to maintain, modernise, optimise or even replace your heating system, require gas pipe testing or need to ensure compliance with the German drinking water regulation, including the necessary renovation work or after-sales service for heating boiler manufacturers – we are always the people to approach when it is a question of building services equipment.

Now operating as a subsidiary of Apleona HSG Facility Management, the world's No. 1 service provider in the field of integrated Facility Management, we rank as Germany's strongest player in our business sector.

From design through realisation and optimisation to regular maintenance, our focus is always providing optimum care for your plant technology.

Our core competencies not only include comprehensive expertise in plant technology, but also customised service concepts for maintenance, servicing and optimisation.
