

Production and processes: We offer more.

Value-creation partner for innovative services.

In today's world of globalised competition, companies must invest all their energy in the quality of their products, with the consequence that your production-supporting processes are more in the spotlight than ever before. Ensure they stand up to this extra scrutiny by collaborating with Apleona HSG as a reliable partner, working with you to create value and achieve maximum plant availability.

Industrial services

We take an integrated view of the production environment, and work with our customers to precisely define the service level that their business needs. A high proportion of our products and services are sourced in-house, enabling us to quickly respond to changing production conditions.

Production-oriented services

Production-oriented services from Apleona HSG Ost GmbH consider the entire machine life-cycle as it is exposed to a variety of demanding production environments in industry. This enables us to adopt a proactive approach, in advance of equipment breaking down. We don't just have our eye on individual components, but above all their interfaces with other systems. Apleona HSG is a high-end service provider which employs people with specialist qualifications and core expertise.
