

Optimum care for your plant technology

The leading service provider for building services in Germany.

For many years we have been the first port of call in Germany for problems and solutions involving building equipment with a focus on heating.

We are the leading Germany-wide service provider for building services installations. From planning, replacing, updating, or maintaining your heating system; to gas-pipe testing or implementing the German drinking water regulation, including the necessary renovation work, we are always the right choice when it comes to building services systems.

We operate as a subsidiary of Apleona HSG Facility Management – the world's leading service provider in the field of integrated Facility Management – and are one of the strongest players in our business sector in Germany.

Based on our extensive specialist knowledge, we offer a service package adapted to your needs, for the maintenance, upkeep and optimisation of your plant technology.
