

Sustainable FM in the fight against climate change

Building operation is the crucial pivot point in improving your company's eco-balance. Apleona HSG is your experienced partner, helping you to make your real estate sustainable. We'll focus on the environment together. nachhaltigkeit@apleona.com

CERTIFIED SUSTAINABILITY IN FACILITY MANAGEMENT

GEFMA160 certification permits uniform, structured and objective assessment of sustainable operation – irrespective of building quality. Facility Management processes in a building are examined and assessed according to the recognised PDCA cycle: Plan, Do, Check, Act.

Benefits of GEFMA 160 certification

- ≡ Sustainability in building operation, regardless of the building fabric
- ≡ Transparent and valid data relating to improving your property's eco-balance
- ≡ Quality management tool for safeguarding operator responsibility
- ≡ Maximising FM performance through the use of the PDCA cycle
- ≡ Preparation against risks of climate change and political specifications
- ≡ A prestigious quality seal for sustainable and innovative companies

GEFMA 160 – now as a digital application

Sustain FM, the digital solution – available as a quick check or a complete certification
